AcreValue provides valuation, soil survey, and crop history reports for individual fields of farmland. Our valuation model utilizes over 20 field-level and macroeconomic data variables to estimate the value of an individual plot of farmland in California, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Michigan, Minnesota, Nebraska, North Carolina, Ohio, Oklahoma, South Carolina, South Dakota, Tennessee, and Wisconsin. Soil information is sourced from the SSURGO database developed by the National Cooperative Soil Survey. Crop history information is sourced from the NASS Cropland Data Layer (CDL).
